ANN E. MECCARIELLO  
SUPERINTENDENT

---

November 22, 2021

Dear Parent or Guardian:

In September of 2016, New York State signed into law requirements to test all sources of potable water within school districts for lead contamination and required districts to take responsive actions. The law required initial sampling to be conducted in 2017 with recurring sampling happening every five years.

In the summer of 2021, the district tested 109 water sources for lead contaminants. During this test, the district found 16 sources above the threshold of 0.015MG/L set by the State Department of Health and State Education Department.

45 water sources were tested at the Campbell Jr./Sr. High School with 8 testing above the threshold. At the Savona Elementary School 63 tests were conducted with 8 returning levels above the threshold. One source was tested at the Bus Garage which returned a level that was below the threshold. All outlets that tested above the threshold were immediately labeled as "non-potable." Three were removed from service due to replacement during construction, and they are scheduled to be re-tested when the new faucets are in place. The other 13 were re-tested.

Out of the 13 sources needing re-testing 5 returned results above the 0.015MG/L benchmark. These sources have been labeled "non-potable."

Savona Elementary School Room 110 Sink 1  
Campbell Jr./Sr. High School Room 1084 Sink  
Campbell Jr./Sr. High School Room 2018 Sink  
Campbell Jr./Sr. High School Room 2013 Sink

The safety and health of our students, staff, and community is a top priority. All test results are posted on our website as they are received. If you have any questions or concerns please do not hesitate to contact Mr. John Machuga, Director of Facilities at 527-9800, ext. 3019 or [jmachuga@cscsd.org](mailto:jmachuga@cscsd.org).

Sincerely,  
Ann Meccariello  
Superintendent of Schools
